| 📍 Hyderabad, Telangana

Objective:

Results-driven AI/ML and Data Science undergraduate passionate about building scalable, intelligent systems that solve real-world problems. Seeking to contribute advanced modeling, analytics, and automation skills to develop high-impact, data-driven solutions in a dynamic environment.

Education:

Nalla Narasimha Reddy Group of Institutions

August 2022 - present

B.Tech in Computer science and Engineering – (AI & ML), Hyderabad, Telangana. *CGPA: 8.7*

Telangana State Residential Junior College

June 2020 – May 2022

Intermediate, Yadadri Bhuvanagiri, Telangana. *Percentage: 96.5%*

Key Projects:

SpendShield AI

Python, LangGraph, GCP, FastAPI, MongoDB

- Architected an Agentic AI-driven fraud detection platform for large-scale public expenditure analysis.
- Engineered a multi-agent ML/NLP pipeline with OCR for automated processing of invoices, tenders, and approvals.
- Designed anomaly detection and risk-scoring models with explainable AI capabilities.
- Deployed production-grade FastAPI services on GCP using Docker and MongoDB.

Credit Score Intelligence

Python, Scikit-Learn, Streamlit, Flask

- Engineered an AI-powered credit scoring system for real-time financial risk assessment.
- Developed advanced preprocessing pipelines, feature engineering strategies, and predictive ML models.
- Built scalable Flask-based APIs enabling real-time credit score inference.
- Delivered interactive analytics dashboards via Streamlit and React with end-to-end integration.

Movie & Book Recommendation Engine

Python, SQL, Flask

- Architected a personalized recommendation engine using advanced ML and data modeling techniques.
- Implemented collaborative and content-based filtering algorithms for high-accuracy recommendations.
- Applied NLP-driven feature extraction and similarity modeling on large-scale metadata.
- Delivered real-time recommendations through RESTful Flask APIs and integrated frontend systems.

Skills:

Programming Languages: Python, Java, JavaScript, TypeScript, SQL, HTML, CSS, C#

Frameworks & Libraries: React.js, Next.js, Node.js, FastAPI, Flask, Tailwind CSS, Streamlit, Scikit-learn, XGBoost, Unity

Databases & DevOps: MySQL, PostgreSQL, MongoDB, Docker, Git, GitHub

Backend & System Concepts: RESTful APIs, JWT, Scalability, System Design, Model Deployment, FinTech Systems

Machine Learning & AI: Machine Learning, Supervised Learning, Anomaly Detection, Recommendation Systems, Natural Language Processing (NLP), Feature Engineering, Model Evaluation, Explainable AI (XAI)

Domain Expertise: Digital Lending, Credit Scoring Models, Fraud Detection Systems, Payment Gateway Integration, UPI Flow Simulation, Public Expenditure Analysis, Augmented Reality (AR)/Virtual Reality (VR)

Soft Skills: Communication, Problem Solving, Team Collaboration, Ownership, UI/UX Thinking
